

Drumcorps - Grist (Ad Noiseam / Cock Rock Disco / 013)

Aloha Metalfriends. Here is digital shredded what Grindcore had not yet on the screen (with bonus amen). This can be seen either as Gabba's own favorite substitute, or as the most silly joke of the season, or even for a slightly unnecessary merger. If there were radio broadcasts where you could hear such a track in between, and then Indie, then Grime, and so on, in short, if John Peel still existed, I'd think so much better.
