Anyone have a copy of this with the birthday cake jacket that they would be willing to sell?

Absolutley stunning remix release from Drumcorps. The 3 tracks included aren't as technical / mental as his previous tracks, thats not to say that they're easy on the ears though as they hit hard and do the the job brilliantly.

Then there's the press itself and the artwork, very pleasing on the eye. I personally have never come across a vinyl press like it.

A true one off and a must for any Drumcorps or Grindcore fans collection.
